DYNNARO TECHNOLOGIES
"CONSERVE TO PRESERVE"

Dynaro Technologies is a multi-service organization. It is dedicated to offer services for Industries like HVAC, Automotive, Oil & Gas, Refinery, Power Plants and General Engineering etc. It is focused on research and developments (R&D) work on Energy Saving Technologies.

Advantages

Automatic Water Treatment System:

- Automatic and reliable turnkey system
- Requires no additives or consumables
- Low operating and maintenance costs
- Robust long life & environment friendly
- Saves up to 60 - 80% of the blow-down water
- Controls and kills bacteria, prevents growth of algae
- Continuously cleans the basin water by recirculation
- Creates an alkaline pH environment that prevents corrosion
- Avoids the need of chemical treatment and dosing equipment
- High performance sand filter cleans water and capture solids
- Automatic self-cleaning to remove accumulated dirt and scale

On-Line Tube Cleaning System:

- Eliminates fouling and scaling
- Improved Operating Efficiency
- Eliminate Costly Down Time by keeping the process running
- Extension of Capital Equipment Life Cycle
- Save Energy & Environment Friendly

SELCOMS

The primary business of Selcoms is providing energy management solutions, based originally in energy storage around the Lead Crystal battery technology and its heat resilience compared to equivalent technologies in the Gel and AGM space, as well as Lithium based products.

About BOOSTplus

BOOSTplus is 100% natural with no synthetic chemicals added. When it combusts, it adds no new emissions or unknown chemicals as it 97% fatty acid methyl esters (FAME), from 100% natural sustainably farmed and produced palm oil. It is simply an fatty acid ester based hydrocarbon chain, similar to what is in #fossilfuels, but with a few extra oxygen molecules.

This acts as a natural lubricant (refineries add FAME to their fuel to improve the lubricity lost from removing the sulphur from the fuel), and it is also a natural detergent. Once we have taken your engine through the clean-up phase, this will help to keep it clean from carbon deposits. All 100% naturally.

Benefits

- Just 0.125% add rate to Diesel or Petrol
- 1 litre eliminates 428kg CO₂e
- 1 Hectare of Palm sequesters more carbon than natural forest
- BOOSTplus reduces Diesel or Petrol consumption

THERMO ELECTRIC

We would like to take the opportunity to introduce Thermo Electric (TE) as a Global leader in Temperature sensor (Thermocouple & RTDs) manufacturing since 1941.

TE THERMO ELECTRIC is GE approved OEM for Thermocouple & RTD of GE make Gas Turbines.

Product Range of TE Thermo Electric

- Immersion Thermocouples
- Immersion Thermocouples with Lead Wire
- Immersion Thermocouples with Armored Lead Wire
- Immersion RTD's
- Bayonet Thermocouples
- Gasket Thermocouples
- Industrials Thermocouples & RTDs
- Tube Skin Thermocouples
- Knife Edge Thermocouples
- Thermocouples for Molten Aluminium
- Thermowells
- Transmier Assemblies
- Connectors
- Jack Panels
- Accessories
- Insulated Thermocouple Wire

Power Plant Equipment and Spares

We are supplying OEM recommended Mechanical/ Electrical/ Instrumentations equipments and spare parts for Gas Turbine, Steam Turbine & Boilers.
